General instructions

Please refer to the guidelines for full instructions on how to complete this form and information on the implementation of the Scheme.

The forms are suitable for generation by computer. They should always be submitted as hard copy, with responses printed in type rather than handwritten.

Additional sheets should be appended, as necessary, to accommodate remarks and explanations.

Explanatory notes

¹ This certificate, which is in the format recommended by WHO, establishes the status of the pharmaceutical product and of the applicant for the certificate in the exporting country. It is for a single product only since manufacturing arrangements and approved information for different dosage forms and different strengths can vary.

² Use whenever possible international nonproprietary names (INNs) or national nonproprietary names

³ The formula (complete composition) of the dosage form should be given on the certificate or be appended

⁴ Details of quantitative composition are preferred, but their provision is subject to the agreement of the product-license holder

⁵ When applicable, append details of any restriction applied to the sale, distribution, or administration of the product that is specified in the product license. ⁶ Sections 2A and 2B are mutually exclusive.

⁷ Indicate, when applicable, if the license is provisional or if the product has not yet been approved.

⁸ Specify whether the person responsible for placing the product on the market:

- a) Manufactures the dosage form;
- b) Packages and/or labels a dosage form manufactured by an independent company; or
- c) Is involved in none of the above.

⁹ This information can be provided only with the consent of the product-license holder or, in the case of non-registered products, the applicant. Non completion of this Section indicates that the party concerned has not agreed to inclusion of this information. It should be noted that information concerning the site of production is part of the product license. If the production site is changed, the license must be updated or it will cease to be valid.

¹⁰ This refers to the document, prepared by some national regulatory authorities, that summarizes the technical basis on which the product has been licensed. ¹¹ This refers to product information approved by the competent national regulatory authority, such as a Summary of Product Characteristics (SPC).

¹² In this circumstance, permission for issuing the certificate is required from the product-license holder. This permission must be provided to the authority by the applicant.

¹³ Please indicate the reason that the applicant has provided for not requesting registration:

- a) The product has been developed exclusively for the treatment of conditions-particularly tropical diseases-not endemic in the country of export.
- b) The product has been reformulated with a view to improving its stability under tropical conditions.
- c) The product has been reformulated to exclude excipients not approved for use in pharmaceutical products in the country of import.
- d) The product has been reformulated to meet a different maximum dosage limit for an active ingredient.
- e) Any other reason, please specify.

¹⁴ Not applicable means that the manufacture is taking place in a country other than that issuing the product certificate and inspection is conducted under the aegis of the country of manufacture.

¹⁵ The requirements for good practices in the manufacture and quality control of drugs referred to in the certificate are those included in the thirty-second report of the Expert Committee on Specifications for Pharmaceutical Preparations (WHO Technical Report Series, No.823,1992, Annex1). Recommendations specifically applicable to biological products have been formulated by the WHO Expert Committee on Biological Standardization (WHO Technical Report Series, No.822,1992, Annex1).

¹⁶ This section is to be completed when the product-license holder or applicant conforms to status(b) or(c) as described in note7above. It is of particular importance when foreign contractors are involved in the manufacture of the product. In these circumstances the applicant should supply the certifying authority with information to identify the contracting parties responsible for each stage of manufacture of the finished dosage form, and the extent and nature of any controls exercised over each of these parties.

- The TS constitute the benchmarks against which the Procuring Entity will verify the technical responsiveness of Tenders and subsequently evaluate the Tenders. Therefore, well-defined TS will facilitate preparation of responsive Tenders by Tenderers, as well as examination, evaluation, and comparison of the Tenders by the Procuring Entity.
- Technical Specifications shall be fully descriptive of the requirements in respect of, but not limited to, the following:
 - a) Standards of materials and workmanship required for the production and manufacturing of the Goods.
 - b) Detailed tests required (type and number).
 - c) Other Related Services required to achieve full delivery/completion.
 - d) Detailed activities to be performed by the Supplier, and participation of the Procuring Entity there on.
 - e) List of detailed functional guarantees covered by the Warranty and the specification of the liquidated damages to be applied in the event that such guarantees are not met.

A set of precise and clear specifications is a prerequisite for Tenderer stores pond realistically and competitively to the requirements of the Procuring Entity without qualifying their Tenders. The sample text provided in this section should serve as guidance only. This text is not intended to be used verbatim since technical specifications specific to each procurement should be drafted by the Procuring Entity for inclusion in the tendering document. In the context of international competitive procurement process among qualified firms, the specifications must be drafted to permit the widest possible The technical specifications establish the requirements for good manufacturing practices (GMPs), pharmacopeial standards, nomenclature, and description required for each product, shelf life and package expiration date parameters, labeling instructions, packaging instructions, GMP and quality assurance certificates required, and other evidence of product quality to be submitted with the Tender and with each shipment. Only if this is done will the objectives of economy, efficiency, and fairness in procurement be realized, responsiveness of Tenders be ensured, and the subsequent task of Tender evaluation facilitated.

Specific pharmacopeia standards should be listed for each product; if any of a range of standards is adequate (British Pharmacopoeia, United States Pharmacopoeia, European Pharmacopoeia, or International Pharmacopoeia), this should be noted. If special packaging or labeling is required for a subset of products, this should be indicated on the schedule of requirements (see above), but a generic statement of packaging and labeling applied to all products should be included in the general technical specifications. Instructions about labeling (contents and language)and package inserts can be included in the technical specifications, unless there are specific requirements for each batch or schedule of requirement.
